3) The use of quaternary ammonium compounds is allowed only for fixing purposes in the dyeing process. The exception of the use may be reviewed in 2 years from adoption of the GOTS 2.0. (See GOTS 2.0, chapter 2.3.1.)

5) This product contains ingredients known to be harmful for the environment (aquatic, terrestrial, climatic). Please install measures to avoid a release into the environment (chapter 2.3.2.).

6) This product contains ingredients which may cause sensitisation by inhalation (R42) or may cause sensitisation by skin contact (R43). This means it may lead to allergies. Please install appropriate occupational health and safety measures.

7) According to the producer this product contains no ingredients produced using genetically modified organisms (GMO). (See GOTS 3.0, chapter 2.3.1.).

8) The use of this product is restricted to textile companies that have/ are connected to a functioning treatment of the sewage-sludge in addition to the obligatory disposal (See GOTS 2.0, chapter 2.4.10.).

**This list contains only those chemical products, for which "Rudolf GmbH" has applied for approval according to the Global Organic Textile Standard (2.0/3.0) and which have passed the assessment of IMO according to the requirements of GOTS Version 2.0/3.0. The assessment has been based on the current version of the material safety data sheets (MSDSs) and further product documentation provided by the supplier.**

**"Rudolf GmbH" remains responsible for compliance with the GOTS-criteria, for the correctness and completeness of the data as well as for providing relevant updates and information that became available after approval. IMO cannot be held liable for any loss or damage resulting from the use of these chemical products, including the failure to meet any limit values.**

**This list replaces all previous versions. It is valid until it is recalled or until a new list is issued, the latest, however, until a new version of the GOTS standard has entered into force.**

**About us:** The Institute for Marketecology (IMO) is one of the first and most renowned international agencies for inspection,

certification and quality assurance of organic and eco-friendly products. IMO focuses on inspection and certification and the development of the related audit schemes, furthermore IMO acts as a pioneer in various sectors: In the field of ecological textiles, IMO has been involved in the development of GOTS and became the first certification body officially approved to offer certification according to this world-wide accepted standard. IMO has also been active in Social and FairTrade auditing for many years. Our experts developed FairForLife, a brand neutral third party certification programme for Social Accountability and FairTrade in initial production, manufacturing and trading. More information about IMO at [www.imo.ch](http://www.imo.ch) and our Social&FairTrade Certification at [www.fairforlife.net](http://www.fairforlife.net).
